Sana'a University, Microsoft & Al-Salam signed an agreement to deploy Microsoft's leading e-learning solution to over 70,000 staff and students in Yemen. Under the agreement, Sana'a University will deploy Microsoft's Learning Gateway Solution, an advanced e-learning platform that provides a host of functions and services to educational institutions. Sana'a University signed an agreement to deploy Microsoft's leading e-learning solution to over 70,000 staff and students in Yemen. Under the agreement, Sana'a

University will deploy Microsoft's Learning Gateway Solution, an advanced e-learning platform that provides a host of functions and services to educational institutions. Sana'a University is the largest university in the Middle East, and the Learning Gateway Solution will connect the students with a powerful integrated learning environment, that includes course content, online examinations and course work submission, and communication and collaboration tools. Once complete, the project will be the largest e-learning deployment in the region.

SabaFon, Yemen's largest GSM company, recently announced that it has signed an Enterprise Agreement with Microsoft and Al-Salam ITD, covering software and support for 600 desktops. The agreement provides the company with the latest, legal versions of Microsoft software, and entitles them to unlimited product support from Microsoft's Arabic-language service engineers. Under the terms of the Enterprise Agreement, SabaFon is also automatically entitled to any upgrades to the software it has purchased that are released during the period of the agreement,

as part of the Software Assurance scheme. SabaFon is the largest GSM network provider in the developing Yemeni market, with around 68% coverage of the country. Since beginning operations in 2001, SabaFon has looked to cutting edge technology, with proper standards of support, to provide the best possible service to its customers. With the company expanding its operations and building new commercial models, it chose to opt for fully supported software from Microsoft to ensure that it could continue to deploy world-class technology.

Yemen Petroleum Company (YPC) has announced that it is set to deploy a whole new IT infrastructure based on Microsoft technology, which will give it complete control over its financial management and business processes. The sole distributor for petroleum in Yemen, YPC will roll out a wide range of solutions, including ERP, office productivity, communications and network infrastructure solutions from Microsoft YPC is currently undergoing a complete restructure, and the new technology platform will help the company to manage all aspects of its business. The solution includes Microsoft Business

Solutions Great Plains 8.0, which provides the core ERP functions, Microsoft Exchange, Microsoft Office 2003 and SQL Server 2000. The deal includes a Microsoft Enterprise Agreement to license software, which will give YPC rights to free upgrades of all of their Microsoft software for two years, under the Software Assurance scheme, as well as enhanced support and a closer working relationship with Microsoft. The project design was carried out by Al-Salam Establishment - IT Division, part of the Al-Ahmar Group (Contractor), Microsoft's key and largest partner in Yemen.
